SEN 2015 H440×Φ140mm(Left), H380×Φ120mm(Right) 個人蔵 Private collection 写真提供 酉福ギャラリー Photo courtesy Yufuku Gallery 中田雅巳は、九谷焼の未来を担う、いま注目の作家である。その作品は、 素地の上に異なる色の化粧土を塗り、針で線を丁寧に掻き落とし、窪みの 部分に別の化粧土を塗り込むという繊細な手法である。この「SEN」と名 付けられた作品によって様々な公募展に入選し、近年ではドイツ、オラン ダ、シンガポールなど海外にも活動の領域を広げている。まさに「SEN」シ リーズは、中田のライフワークと呼んでもいいだろう。

中田は幼い頃、父親がエンジニアをしていたので、将来はなにかもの作 りに携わりたいと思っていた。小学校の時、課外授業ではじめて上絵付体 験をして、やきものに興味を持った。1997年に石川県立九谷焼技術研修所 卒業。2004年に独立。現在は、能美郡川北町に工房を構えて作家活動をお こなっている。

中田は、「SEN」シリーズの制作に際し、これまでたくさんの色の化粧土 を使用してきたが、とくに九谷焼を意識したことはなかった。中田の作品 は伝統的な九谷焼の色絵ではなく、手法も見た目も従来の九谷焼の概念を 大きく覆している。中田は、はじめ上絵付を中心に器を制作していた。と ころが、自分は絵付より形作りの方が好きだったので、自然と磁土を使っ た白磁を作るようになった。しかし、なにか変化が欲しくなり、掻き落し や象嵌といった様々な技法を試行錯誤しているうち、「SEN」の技法に辿り 着いたという。

2006年、金沢わん・One大賞「人・器・出会い」展で優秀賞を受賞した のを切っ掛けに、東京の百貨店の食器売り場でも展示されるようになつ た。上京の折に訪ねた南青山のギャラリーの空間の中に、自分の作品をい つか展示したいと思い、今まで以上にアートを意識するようになった。 2011年「菊池ビエンナーレ」に入選、以後、中田の「SEN」シリーズが大き く注目されることとなった。

中田作品の特徴は、洗練されたシャープなフォルムと、それを覆うマッ トで鮮やかな単色の色彩である。「SEN 2012」は、白い生地の上に黒い化 粧土を塗り針で線を丁寧に掻き落した中田の代表作である。また、「SEN 2015」「SEN 2017」の造形はどこまでも現代的であるが、使用する化粧土 は九谷の五彩(赤、青(緑)、紫、黄、紺青)の色に落ち着き始めて、伝統と モダンの融合を図りつつある。

中田のライフワークとなった「SEN」シリーズの今後の展開が楽しみで ある。

中田雅巳展 SEN NAKADA Masaru

森孝一 (美術評論家・日本陶磁協会常任理事) MORI Koichi, Art Critic; Executive Director, Japan Ceramic Society

Masaru Nakada is attracting the attention of ceramics lovers as a future leader of Kutani ware. He creates works using the delicate technique of covering the base surface with engobe in a different color, carefully etching lines in the covered surface, and applying a different kind of engobe to the etched lines. This series of works, named "SEN" (literally meaning "lines" in Japanese), has been selected for various open-call exhibitions, allowing the artist in recent years to expand the geographic scope of his activities to other countries, including Germany, the Netherlands, and Singapore. The SEN series really deserves to be called Nakada's lifework.

In his childhood, under the influence of his engineer father, Nakada wished to be engaged in some kind of creative enterprise in the future. He became interested in ceramics when first experiencing overglaze painting in an extracurricular class at elementary school. He graduated from the Ishikawa Prefectural Kutani Ware Technical Institute in 1997, and became an independent ceramic artist in 2004. He currently conducts creative activities at his own studio in Kawakita Town, Nomi District in Ishikawa Prefecture.

While Nakada has so far used engobe in many colors to create the SEN series, he has not particularly referred to the orthodox style of Kutani ware. His works are distinctively different from traditional overglaze-painted Kutani ware, going far beyond the conventional concept of what Kutani ware is. Although Nakada did mainly create overglaze-painted vessels during the early phase of his career, his stronger interest in shaping over painting naturally led him to create white porcelain with kaolin. However, with a desire for variations, he began to use various techniques, such as etching into covered surfaces and inlaying, through a process of trial and error, resulting in the technique he currently uses for the SEN series.

After he won an award for excellence at the Kanazawa One Grand Prix "People, Vessels, and Encounters" exhibition in 2006, his works began to be displayed in the tableware sections of department stores in Tokyo. Visiting a gallery in Minamiaoyama while in Tokyo, he hoped to have his works exhibited at that gallery, and he has since been more highly motivated to create "artworks." His selection for the Kikuchi Biennale in 2011 focused special attention on his SEN series.

The prominent features of Nakada's works are their sophisticated sharp forms, and bright and matte uniform coloring. SEN 2012, Nakada's signature work, features lines carefully etched in black engobe covering the white base, while SEN 2015 and SEN 2017, with forms appealing to contemporary taste, are characterized by engobe in the "five Kutani colors"—red, green, purple, yellow, and deep blue—indicating a shift in Nakada's focus to an integration between the traditional and the modern.

I look forward to seeing how the SEN series, Nakada's lifework, will progress from now on.
